EMPLOYMENT

Data Engineer **SimpliSafe** **November 2021 - Present**

- Assist team in writing data platform that reliably serves dozens of terabytes of data to hundreds of users
- Add metric alerts to AWS CloudWatch which alert us when a Kinesis Firehoses is sent more data than it can consume, preventing data loss
- Wrote unit and integration tests to ensure core API services work correctly

Actuarial Intern, Pricing **John Hancock** **August 2019 – November 2021**

- Utilized Python's AST module to compile formulas in a valuation model specification into excel formulas for an untimely request from regulators. Converting the formulas programmatically saved hundreds of hours of manual labor and allowed my team to deliver on the request a week early
- Implemented python script to allocate aggregate variable annuity reserves to individual policies, and wrote tests ensuring that reserves are allocated correctly
- Prepared quarterly capital and remittance forecasts and communicated results to senior management

Actuarial Intern, Valuation **John Hancock** **Summer 2018**

- Utilized specialized actuarial software to run life insurance sensitivities needed by pricing team to restructure Universal Life products
- Reviewed final calculations and VBA code for new guaranteed issue final expense product
- Helped pricing team move a model from excel into python by creating a script to load initial rates

EDUCATION

Philadelphia, PA **Temple University** **August 2015 – May 2019**

- B.A in Actuarial Science with minor in Computer Science, May 2019. *Summa Cum Laude*
- Relevant Coursework: Actuarial Modeling, Discrete Mathematics, Intermediate Statistics, Data Structures

TECHNICAL EXPERIENCE

Projects

- **PDP Emulator** (2021). PDP11 emulator implementing a large subset of the original instruction set.
- **Markov Chain Animator** (2021). Python script used to animate Markov chains for educational purposes.

ADDITIONAL EXPERIENCE AND AWARDS

- **Gamma Iota Sigma, Fall 2016 – Spring 2019:** Member with academic distinction
- **Best Capstone Presenter, Spring 2019**
- **Temple Running Club, Fall 2015 – Spring 2017**
- **Target Analytics Challenge, Fall 2017**: Placed fifth in school-wide data analytics competition sponsored by Target which aimed to derive business strategies for Target using customer data as well as external research
- **Temple Data Analytics Challenge, Fall 2016**: Placed third out of 180 applicants in data analytics competition which aimed to determine the most effective way to combat global diabetes epidemic
- **Temple Presidential Scholarship, Fall 2015 – Present**

Languages and Technologies

- Python (Proficient), R (Proficient), VBA (Proficient), C (Proficient), SQL (Experience), Bash (Experience)
- PyCharm, Spyder, Vim, Jupyter Notebook, RStudio
